

ALASKA DEPARTMENT OF FISH AND GAME KODIAK AREA SALMON STATISTICAL CHART

Revision - January 2016

This chart is intended as a general guide for fishermen, tender operators, and other industry personnel. For exact descriptions of the district and section boundaries, closed waters, legal gear, and other information pertinent to the Kodiak commercial salmon fishery, consult the current issue of the Alaska Commercial Fishery Regulations for the Kodiak Area (SAAC 18).

The approximate location of each salmon stream, areas normally closed to salmon fishing, areas open to each gear type, district and section boundaries, and the statistical areas used in reporting catches are depicted on this chart and are designated as follows:

Streams may have ADF&G markers deployed which designate area closed.

Streams without ADF&G markers deployed are open seaward of the exposed tideland banks.

*In the Kodiak Area, salmon may not be taken within designated freshwater salmon streams and rivers, and all saltwater within 500 yards of all points of a strait line extending between the seaward extremities of the exposed tideland banks, or as marked by ADF&G regulatory markers. Where regulatory markers have been deployed by the department to aid fishermen in determining closed waters, the marker will be placed as close as possible to the described locations or in a location deemed necessary. It is illegal to fish on the streamward side of the marker. (SAAC 18.350(a),(10) and (b)).

*According to Title 50, Part 674, of the Code of Federal Regulations, it is unlawful to engage in commercial fishing for salmon in the waters lying beyond the seaward boundary of the state, (the "three mile limit") west of Cape Stelling.
